INNOVATIVE DEGREES

INTERDISCIPLINARY STUDY

GLOBAL EXPERIENCE

Choose to study at a University that provides a dynamic, supportive, and collaborative environment, offering academically rigorous degree programmes that prepare graduates with the essential skills and knowledge sought after by organisations, employers, and society.

Northeastern University London has a truly international outlook, while retaining its academic independence as a UK higher education provider with its own degree awarding powers.

Our degrees are designed to provide students with rigorous and in-depth subject study, while developing a range of practical transferable skills and exploring a variety of complementary disciplines. Degree courses are built around real-world challenges empowering meaningful impact in a fast changing world.

01 INNOVATIVE DEGREES

Northeastern University London is part of Northeastern's global, experiential, research university network, built on a tradition of engagement with the world. We support our students to grow as innovative problem solvers through academic study, one-to-one mentoring, and world-leading experiential learning opportunities.

Our education embraces 'learning by doing'. It integrates classroom learning with wider-world experience, empowering students to make a meaningful impact and to transform knowledge and skills across contexts.

02 INTERDISCIPLINARY STUDY

Expand your academic horizons and customise your educational journey by choosing personalised elective pathways alongside your core degree courses. Delve deeper into your chosen field of study or explore a diverse range of subjects, fostering agile thinking across disciplinary boundaries.

03 GLOBAL EXPERIENCE

Study abroad

Find out about a wide range of international opportunities through our Global Network with campuses in Boston, Charlotte, Oakland, Seattle, Silicon Valley, Toronto and Vancouver, as well as Northeastern University London.

Discover flexible, exciting and immersive international study opportunities, including the chance to spend a semester or a year, or both, studying at another global network location.

Double Degrees

Explore unique and exciting opportunities to study for two globally recognised degrees simultaneously over four years, a UK undergraduate awarded by Northeastern University London, and a US bachelor's degree awarded by Northeastern University (Boston, MA).

There are also options to study for a UK undergraduate degree and an accelerated US Masters degree over just four years, or a UK undergraduate degree and UK Masters degree.

Inside

- 03 Introduction
- 05 Experience the University
- 06 Degree programmes
- 20 Interdisciplinary study
- 22 Experiential learning
- 22 Co-op placements

- 25 Study abroad
- 27 UK & US degree options
- 30 Teaching & assessments
- 31 Core competencies
- 33 Our campus
- 34 London as your classroom
- 35 Libraries & study spaces
- 37 Widening participation
- 39 International students
- 40 Academic support
- 41 Student Support and Development
- 42 Careers support
- 43 Our graduates
- 45 London life
- 46 Student union
- 47 Accommodation
- 48 How to apply
- 49 Entry requirements
- 51 Fees & funding

“Everyone at the University was friendly, welcoming, and inviting. The talks were informative, especially about careers, and I got to ask any questions I had about the courses. Overall, a wonderful experience!”

Open Day Attendee

Discover Northeastern University London for yourself!

We have a wide range of events on offer for you to find out what makes studying at NU London such a unique experience.

OPEN DAYS

Open Days are the best way to get an insight into what it's like to study NU London. Come and explore our stunning state-of-the-art campus right in the heart of London. Take part in subject sessions, join an interdisciplinary discussion, learn about our careers support, find out about student life, chat to our current students and academic faculty, and discover the lively waterside community at St Katharine Docks, home to our campus.

You can even take in the iconic sights of Tower Bridge and the Tower of London!

CAMPUS TOURS

Take a tour of our magnificent campus with one of our current students to show you around and tell you about university life at NU London.

Tours are followed by a presentation outlining our degree programmes, student life and the application process, with a short Q&A session at the end. Places are limited and advance booking is essential.

ONLINE TASTER LECTURES

Let our world-class faculty inspire you! We hold online taster lectures throughout the year. Taster lectures are a great way to experience university level teaching, to widen your knowledge and to get inspiration for your personal statement.

Full details about all the events taking place at the University can be found at nulondon.ac.uk/visit

01 INNOVATIVE DEGREES

Business BSc (Hons)

The BSc (Hons) Business programme delves into every facet of the business world. Courses use contemporary real-life case studies and examples drawn from a wide range of business types from entrepreneurs to global corporations. This approach enables students to gain a comprehensive understanding of the diverse strategies and management techniques employed by businesses of all scales. These courses utilise the most up-to-date techniques and tools, ensuring that you are well-prepared to meet the constantly evolving demands of the business world.

By enrolling on this degree programme, you will explore the multiple challenges faced across a wide range of businesses to achieve the objectives of their stakeholders, from shareholders and consumers to government, and wider society. These core competencies empower students for long-lasting impact, success, and personal fulfilment. You'll develop management and operational skills across a wide range of business disciplines while enhancing your problem-solving abilities and developing the critical thinking and communication skills needed to thrive in a wide range of careers and achieve impactful outcomes.

This degree programme merges a demanding business curriculum with a tailored personalised elective path, allowing you to delve deeper into your business studies or venture into a wider array of subjects, fostering agile thinking across various disciplines.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by the Academic Advisers.

FIRST YEAR

Required course list:

- LBUSI4203 International Business and Global Responsibility (L4, 15 credits)
- LBUSI4202 Financial Accounting & Reporting (L4, 15 credits)
- LBUSI4206 Introduction to Marketing (L4, 15 credits)

In addition, students must take ONE of the following:

- LECON4205 Introduction to Economics (L4, 15 credits)

OR

- LECON4215 Principles of Microeconomics (L4, 15 credits) AND
- LECON4214 Principles of Macroeconomics (L4, 15 credits)

Not required but recommended:

- LMATH4201 Calculus for Business (L4, 15 credits)

OR

- LMATH4204 Mathematical Methods 1 (L4, 15 credits) or other introductory mathematics course.

In addition, take available L4 courses from the University Courses List to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LMATH5200 Business Statistics (L5, 15 credits)
- LBUSI5202 Management Information Systems (L5, 15 credits)
- LBUSI5201 Financial Management (L5, 15 Credits)
- LBUSI5203 People & Organisations (L5, 15 credits)

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LBUSI6201 Innovation! (L6, 15 credits)
- LBUSI6203 Supply Chain and Operations Management (L6, 15 credits)
- LBUSI6205 Strategic Analysis and Decision Making (L6 15 Credits)
- LBUSI6200 Final Project (Business) (L6, 30 credits)

In order to meet the relevant discipline learning outcomes, take at least ONE course from this list*

- LBUSI6204 Sustainability in the Business Environment (L6, 15 credits)
- LBUSI6202 Fintech and Financial Innovation (L6, 15 credits)

In addition, take available courses (typically all at L6) from the University Courses List to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the year.

The courses that run in each academic year are subject to change in line with faculty availability and student demand, and may have limited capacity or be unavailable to you due to the timetable. There is, therefore, no guarantee every course will be available every year.

Data Science BSc (Hons)

The BSc (Hons) Data Science will enable you to develop cutting edge technical and problem solving abilities, while honing the critical thinking and communication skills that are required to excel in a multitude of technology careers, and to deliver impactful results by harnessing new technologies.

Courses examine the collection, storage, retrieval and computational analysis of data in various forms (from images to text) and scales (from small to big data), covering key topics such as programming, machine learning and data mining, and information visualisation. The programme teaches the knowledge and techniques to programme with data, learn from data, interpret and visualise it in a way that solves real-world problems.

By enrolling on this degree programme you will immerse yourself in innovative courses that are at the forefront of the industry utilising the most up-to-date techniques and tools, ensuring that you are well-prepared to meet the constantly evolving demands of technology and to become the next-generation leaders with sustained impact and success.

This degree programme merges a demanding data science curriculum with a tailored elective path, allowing you to focus deeper into your Data Science studies or venture into a wider array of subjects, based on your interests and career goals.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LCSCI4212 Discrete Structures (L4, 15 credits)
- LDSCI4211 Programming with Data (L4, 15 credits)
- LDSCI4210 Intermediate Programming with Data (L4, 15 credits)
- LDSCI4209 Probability and Statistics (L4, 15 credits)

In addition, take available L4 courses from the University Courses list* to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LDSCI5206 Advanced Programming with Data (L5, 15 credits)
- LDSCI5247 Foundations of Data Science (L5, 15 credits)
- LCSCI5208 Database Design (L5, 15 credits)
- LDSCI5209 Information Presentation and Visualisation (L5, 15 credits)

Elective courses include:

- LDSCI5207 Experimental Data Science Project (L5, 15 credits)

In addition, take available L5 courses from the University Courses list* to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LDSCI6210 Machine Learning and Data Mining I (L6, 15 credits)
- LDSCI6211 Machine Learning and Data Mining II (L6, 15 credits)
- LDSCI6209 Large-Scale Information Storage and Retrieval (L6, 15 credits)
- LDSCI6208 Final Project (Computer/Data Science) (L6, 30 credits)

In addition, take available courses (typically all at L6) from the University Courses list* to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including core) programme requirements by the end of the year.

Economics BSc (Hons)

Our BSc (Hons) Economics will provide you with a comprehensive understanding of key economic principles, including economic theory, quantitative analysis, and specialised contextual studies. This theoretical knowledge, combined with the disciplined thinking, problem-solving abilities, critical thinking, and communication skills you will develop, will equip you with the necessary tools to excel in a wide range of careers and make a meaningful impact.

Economics courses are designed to foster a deep understanding of global perspectives, integrating real-life case studies and examples from various regions. Throughout the curriculum, you will have the opportunity to select your own case studies for assessments, allowing for a personalised and engaging learning experience.

By enrolling on this degree programme you will acquire a diverse set of skills, developing analytical thinking and problem-solving abilities and become proficient in both quantitative and qualitative analysis. You will foster a deep understanding of how societies can enhance their material and psychological well-being, and become adept at analysing human behaviour. Moreover, you will develop essential competencies in data management, analysis, and effective communication tailored to different audiences.

This degree programme merges a demanding economics curriculum with a tailored elective path, allowing you to specialise in your economics studies or venture into a wider array of subjects, encouraging adaptability and innovation across a wide range of fields.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LECON4215 Principles of Microeconomics (L4, 15 credits)
- LECON4214 Principles of Macroeconomics (L4, 15 credits)
- LMATH4213 Mathematics (L4, 15 credits)
- LMATH4216 Statistics (L4, 15 credits)

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LECON5211 Microeconomics & Behaviour (L5, 15 credits)
- LECON5214 Macroeconomics & Economic Crises (L5, 15 credits)
- LECON5213 Econometrics & Programming (L5, 15 credits)
- LECON5212 Advancing Global Progress (L5, 15 credits)

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- Social and Heterodox Economics (L6, 15 credits)
- Final Project (Economics) (L6, 30 credits)

In order to meet the relevant discipline learning outcomes, take at least THREE courses from this list:

- LECON6216 Political Economy and Globalisation (L6, 15 credits)
- LECON6217 Political Economy in Action (L6, 15 credits)
- LECON6215 Corporate Finance (L6, 15 credits)
- LECON6214 Econometrics and Forecasting (L6, 15 credits)

In addition, take available courses (typically all at L6) from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the year.

English BA (Hons)

The BA (Hons) English programme offers a comprehensive study of literature across various eras and genres, with a focus on themes such as ‘Satire, Feeling, Innovation’ and ‘Literature, Land and the Environment’. It also covers regional themes, including North America and the vibrant city of London, where you will be studying. There is a strong emphasis on the transformative power of writing, not only as a reflection of the world but also as a catalyst for change. Students will develop a discerning approach to reading, exploring diverse literary forms from lyric poetry to literary criticism, newspaper articles to political speeches.

By enrolling on this degree programme you will enhance your intellectual rigour and elevate your ability to engage with literary texts and the complex issues they explore, cultivating your expertise in analysing literature. You will acquire the necessary tools and confidence to become an original and perceptive critic of literature and broader global concerns. You will develop analytical abilities, along with excellent oral and written communication skills, and combining strategic planning thorough research and critical thinking to effectively evaluate various perspectives and present innovative ideas to diverse audiences. These invaluable strengths are in high demand across industries and offer a vast range of career opportunities upon graduation.

Our innovative Experiential Learning approach embraces the concept of ‘learning by doing’, seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme merges a demanding English curriculum with a tailored elective path, allowing you to study literature intensively or venture into a breadth of subjects, inspiring versatility and creativity across various disciplines.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LENGL4242 Criticism: Practice (L4, 15 credits)
- LENGL4244 The Victorians and Us (L4, 15 credits)
- LENGL4243 Revolution, Rebirth, Religion: Early Modern Poetry (L4, 15 credits)
- LENGL4241 British Drama and the London Stage (L4, 15 credits)

In addition, take available L4 courses from the University Courses List to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LENGL5252 Criticism: Theory (L5, 15 credits)
- LENGL5256 Shakespeare: Seven Plays (L5, 15 credits)
- LENGL5255 Satire, Feeling, Innovation: 18th Century and Romantic Period Poetry and Prose (L5, 15 credits)

At least ONE course from this list:

- LENGL5254 Modernism/Postmodernism (L5, 15 credits)
- LENGL5253 Literature and Decolonisation (L5, 15 credits)

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LENGL6256 Literature, Land and the Environment (L6, 15 credits)
- LENGL6259 North American Narratives/ Counternarratives (L6, 15 credits)
- LENGL6260 London: Literature, Culture, Identity (L6, 15 credits)

History BA (Hons)

The BA (Hons) History introduces students to the full range of history from medieval to modern, from local to global.

Our campus is centred in history, set alongside the iconic Tower of London, the busy river Thames, and bustling St Katharine Docks, where people and goods embarked and arrived on their way to and from the British Empire and the wider world. Fascination with the deep history of Britain and the world and the global connections that created the modern world runs through our History degree.

As well as mastering key skills that are essential for historians: conducting research, critically assessing sources, using digital tools and writing for different audiences, from the scholarly to the public, you will explore the impact of history on modern advancements, and learn to draw on your knowledge of the past to make informed decisions. You will also relate your historical studies to current issues, including global superpowers, economic and societal transformation, historical impacts on contemporary British society and the economic impact of history across the globe.

Our diverse and socially-engaged history curriculum embraces the full range of history, challenging the traditional canon with a critical perspective. Our History courses connect historical topics with contemporary concerns, such as the environment, AI and computing, feminism, anti-racism, and decolonisation.

You’ll develop in-depth research expertise alongside analytical and communication skills that are needed to understand our past and present, and the application of your knowledge to shape our future. These valuable and transferable skills open up a wide array of career possibilities upon graduation.

Our innovative Experiential Learning approach embraces the concept of ‘learning by doing’, seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme merges a demanding history curriculum with a tailored elective path, allowing you to deep dive into history or explore a broader range of subjects, developing cross-discipline ability.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LHIST4220 World History until 1945 (L4, 15 credits)
- LHIST4218 The World since 1945 (L4, 15 credits)
- LHIST4219 In the Shadow of the Tower: Crusade, Plague, and Persecution in the Middle Ages (L4, 15 credits)
- LHIST4217 Historians’ Craft (L4, 15 credits)

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LHIST5221 Public History and Heritage (L5, 15 credits)
- LHIST5220 London’s World War (L5, 15 credits)

In order to meet the relevant discipline learning outcomes, take at least TWO other L5 History courses from the University Courses list. Students must take at least ONE course at level 5 or 6 that does not have an exclusively European focus.

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LHIST6220 Final Project (History) Dissertation (L6, 30 credits)

In order to meet the relevant discipline learning outcomes, take at least FOUR other History courses (typically all at L6) from the University courses list. Students must take at least ONE course at level 5 or 6 that does not have an exclusively European focus.

In addition, take available courses (typically all at L6) from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the year.

Law LLB (Hons)

The Law LLB (Hons) programme covers various areas of law, including contract law, constitutional law, criminal law, tort law, competition law, and property law. These courses provide the fundamental building blocks for a well-rounded legal education and fulfil all the requirements for a qualifying law degree.

Courses go beyond traditional legal studies by exploring the dynamic relationship between law and societal changes, as well as economic developments. Courses on Law and Innovation and Antitrust and Competition offer students the opportunity to engage in thought-provoking discussions and gain a deeper understanding of the evolving legal landscape. The programme also places a significant emphasis on the international dimension of legal practice, including areas such as international labour law and EU law, ensuring that students are well-prepared for the global nature of the legal profession. The curriculum prepares students for the Solicitors' Qualifying Exam, and our Jurisprudence course explores the intersection of philosophy with classic legal theory debates and contemporary developments.

At NU London we offer a unique and comprehensive career development pathway tailored to your specific professional aspirations. Through personalised careers advice, informative seminars, interactive workshops, and inspiring guest speakers, we will guide and support you in choosing the right path and help you succeed in applications for training contracts, vacation schemes, and pupillages.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme merges a demanding law curriculum with a tailored elective path, allowing you to specialise in law or explore interdisciplinary learning and gain expertise across various subjects.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LLAW4223 Contract Law (L4, 15 credits)
- LLAW4224 Contract Law in Context: Extensions and Developments (L4, 15 credits)
- LLAW4221 Constitutional Law (L4, 15 credits)
- LLAW4222 Constitutional Law in Context: Extensions and Developments (L4, 15 credits)
- LLAW4225 Criminal Law (L4, 15 credits)
- LLAW4226 Criminal Law in Context: Extensions and Developments (L4, 15 credits)

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LLAW5226 Tort Law (L5, 15 credits)
- LLAW5227 Tort Law in Context: Extensions and Developments (L5, 15 credits)
- LLAW5223 Equity and Trusts (L5, 15 credits)
- LLAW5224 Legal Research and Advocacy (L5, 15 credits)

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LLAW6232 Property Law (L6, 15 credits)
- LLAW6229 European Union Law Post-Brexit (L6, 15 credits)

ONE of:

- LLAW6231 Final Project (Law): Legal Research Symposium (L6, 30 credits)

OR

- LLAW6227 Final Project (Law): Dissertation (L6, 30 credits)

Optional Course list:

At least TWO courses from this list:

- LLAW6233 Law and Innovation: Digital, Online and Technology Law (L6, 15 credits)
- LLAW6225 Antitrust and Competition Law in the Global Economy (L6, 15 credits)
- LLAW6226 Criminology (L6, 15 credits)
- LLAW6228 Employment Law in an International Context (L6, 15 credits)
- LLAW6230 Jurisprudence and Contemporary Legal Theory (L6, 15 credits)

In addition, take available courses (typically all at L6) from the University Courses list to add up to 120 credits, selected with an Academic Adviser to support progress towards meeting all (including Core) programme requirements by the end of the year.

Philosophy BA (Hons)

The BA (Hons) Philosophy programme delves into the fundamental questions that have intrigued humanity for centuries. Explore the nature of reality, the limits of human knowledge, and the principles that guide our actions. Immerse yourself in the wisdom of the greatest thinkers of the past two and a half millennia, whose insights continue to shape our understanding of the world.

Our diverse and socially-engaged curriculum embraces a wide range of figures, traditions, and methodologies, challenging the traditional canon with a critical perspective. Our degree programme courses connect philosophical topics with contemporary concerns, such as the environment, AI and computing, feminism, anti-racism, and decolonisation.

Through thematic courses, you will not only gain a deeper understanding of how Philosophy reflects societal changes but also actively participates in shaping the world. The programme is designed to equip you with essential skills, such as writing for different audiences and genres, employing ethical reasoning, analysing and utilising data, and integrating knowledge and skills through practical experiences. These core competencies empower students for long-lasting impact, success, and personal fulfilment, as well as a strong foundation for further advanced philosophical study.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme merges a demanding philosophy curriculum with a tailored elective path, allowing you to delve deeper into philosophy or venture into a wider array of subjects including the intersection of humanities and science.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LPHIL4239 Introduction to Philosophy (L4, 15 credits)
- LPHIL4227 Early Modern Philosophy (L4, 15 credits)
- LPHIL4228 Introduction to Logic (L4, 15 credits)
- LPHIL4230 Technology and Human Values (L4, 15 credits)

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LPHIL5228 Ancient Philosophy [nb incorporates political philosophy] (L5, 15 credits)
- LPHIL5230 Ethics (L5, credits)
- In order to meet the relevant discipline learning outcomes, take at least TWO other level 5 Philosophy courses from the University Courses list, at least one of which is in theoretical philosophy.

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

Third Year

Required course list:

- LPHIL6237 Final Project (Philosophy) (L6, 30 credits)
- In order to meet the relevant programme learning outcomes, take at least FOUR other Philosophy courses (typically all at L6) from the University Courses list.

In addition, take available courses (typically all at L6) from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the year.

Politics & International Relations BSc (Hons)

The BSc (Hons) Politics & International Relations degree offers a comprehensive study of political science, political theory, and international relations. Delve into the intricacies of government and society, explore normative questions and ideologies, and gain insights into global issues such as war, peace, security, economy, and globalisation. Understand the dynamic relationships between states and non-state actors through cooperative and conflicting engagements.

Explore a comprehensive curriculum that delves into the relationship between individuals and the state, examining the sources of authority and various forms of governance. Delve into the fascinating realms of power, justice, conflict, and order, gaining a deep understanding of the complexities that shape policy-making, policy choices, and policy outcomes. Uncover the dynamics of agency, exploring concepts such as legitimacy, accountability, sovereignty, and mediation. Our curriculum also emphasises the importance of security, effective governance, and decision-making at different levels, from local to global.

The programme cultivates a diverse range of skills and knowledge that are essential for making informed decisions and shaping policies within institutions. Graduates will excel in managing complex information networks, gathering relevant material from a wide variety of sources, and engaging in practical projects that foster critical thinking. You will gain the expertise to actively contribute to current debates on important issues and apply theoretical and methodological tools for analysing policies, institutions, and behaviour.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme merges a demanding politics and international relations curriculum with a tailored elective path, allowing you to delve deeper into politics and international relations or venture into a wider array of subjects cultivating flexible thinking across diverse fields.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LPINT4234 Introduction to Politics and International Relations (L4, 15 credits)
- LPINT4231 Comparative Politics (L4, 15 credits)
- LPINT4232 Foundations of Western Political Thought (L4, 15 credits)
- LPINT4233 International Relations in Practice (L4, 15 credits)

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LPINT5237 Decolonising International Relations (L5, 15 credits)
- LPINT5241 The European Union in the World (L5, 15 credits)
- LPINT5239 Political Arguments in Action (L5, 15 credits)

At least ONE other L5 Politics & International Relations course from the University Courses list.

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LPINT6244 International Organisations (L6, 15 credits)
- LPINT6242 Security Studies (L6, 15 credits)
- LPINT6246 Final Project (Politics and International Relations) (L6, 30 credits)

In order to meet the relevant discipline learning outcomes, take at least TWO other Politics & International Relations courses (typically both at L6) from the University Courses list.

In addition, take available courses (typically all at L6) from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the year.

Psychology BA (Hons)

The BA (Hons) Psychology programme offers a fascinating exploration into the scientific study of human behaviour. With a focus on the underlying brain activity that influences perception, cognition, emotions, personality, and interpersonal relationships, this interdisciplinary field intersects the boundaries between the natural and social sciences.

Our curriculum delves into the biological, cognitive, and psychosocial aspects of contemporary scientific psychology, enabling students to understand and address everyday issues as well as contribute to the understanding and treatment of mental health problems.

Find out why humans think, feel and act the way they do. Examine conscious and unconscious phenomena, including feelings and thoughts, brain function, emotions, personality, and human development.

In addition to enhancing your verbal communication and active listening skills, studying psychology will sharpen your critical thinking and research abilities. By encouraging you to embrace diverse perspectives and adapt to new information, psychology fosters flexibility in your thinking and problem-solving skills. You will gain valuable insights into conflict dynamics and effective strategies for resolution essential for teamwork and collaboration. You will develop strong writing and presentation skills.

These transferable skills can be beneficial in a wide range of careers, including business, education, healthcare, human resources, and many others.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme blends a demanding psychology curriculum with a tailored elective path, allowing you to deepen your knowledge of Psychology or engage in broader studies, nurturing a well-rounded perspective.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list:

- LPSYC4236 Foundations of Psychology (L4, 15 credits)
- LPSYC4235 Biological Basis of Human and Animal Behaviour (L4, 15 credits)
- LPSYC4237 Developmental Psychology: The human being across the lifespan (L4, 15 credits)
- LPSYC4238 Structure and Function of the Human Brain (L4, 15 credits)

Not required but recommended:

- LMATH4109 Introduction to Business Statistics (L4, 15 credits) or other introductory mathematics courses for students aiming to study the Double Degree programme.

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

SECOND YEAR

Required course list:

- LPSYC5242 Cognitive Psychology (L5, 15 credits)
- LPSYC5243 Research Methods in Psychology (L5, 15 credits)*
- LPSYC5244 Psychology of Individual Differences (L5, 15 credits)
- LPSYC5245 Social Psychology: groups and intergroup dynamics (L5, 15 credits)

In addition, take available L5 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list:

- LPSYC6250 Clinical Psychology (L6, 15 credits)
- LPSYC6251 Research Review in Psychology (L6, 30 credits)
- LPSYC6252 Final Research Project (Psychology) (L6, 30 credits)*

In addition, take available courses (typically all at L6) from the University Courses List to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the year.

Computer Science & Business BSc (Hons)

The BSc (Hons) Computer Science and Business programme offers a comprehensive study of both disciplines, exploring the intriguing intersections between the two.

Students on this programme take one or more courses at the intersections of Computer Science and Business, and their studies culminate with a (typically, integrative) Final Project.

Computer Science in this programme cultivates the knowledge, techniques, and tools necessary to develop cutting-edge and secure computer software within the boundaries of legal, ethical, and professional frameworks. Delve into the fundamentals of programme design, including object-oriented design, software development, computer organisation, systems and networks, theory of computation, principles of languages, as well as advanced algorithms and data analysis.

The business courses are specifically tailored to equip you with the skills and knowledge needed to excel in a variety of organisational settings, whether it be in the commercial, public, or non-governmental sectors. Gain insights into various management approaches, business structures, marketing strategies, supply chain and operations management, as well as financial principles. You'll draw on examples from a wide range of business types, ranging from entrepreneurs to large multinational corporations, private and state-owned enterprises, and both local and global organisations.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

In addition to a demanding computer science and business curriculum, this programme offers you the opportunity to explore different disciplines with your choice of elective courses.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

FIRST YEAR

Required course list (Computer Science):

- LCSCI4212 Discrete Structures (L4, 15 credits)
- LCSCI4207 Fundamentals of Computer Science I (L4, 15 credits)
- LCSCI4208 Fundamentals of Computer Science II (L4, 15 credits)

Required course list (Business):

- LBUSI4206 Introduction to Marketing (L4, 15 credits)
- LBUSI4202 Financial Accounting and Reporting (L4, 15 credits)
- LBUSI4205 Introduction to Economics (L4, 15 credits)

In addition, take any available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

Not required but recommended:

- LMATH4201 Calculus for Business (L4, 15 credits)

OR

- LMATH4204 Mathematical Methods 1 (L4, 15 credits)

SECOND YEAR

Required course list (Computer Science):

- LCSCI5205 Object-oriented design (L5, 15 credits)
- LCSCI5204 Algorithms & Data (L5, 15 credits)
- LCSCI5208 Database Design (L5, 15 credits)

Required course list (Business):

- LBUSI5203 People and Organisations (L5, 15 credits)
- LMATH5200 Business Statistics (L5, 15 credits)
- LBUSI5201 Financial Management (L5, 15 credits)

Required course (integrative):

- LBUSI5202 Management Information Systems (L5, 15 credits)

In addition, take any available L5 course from the University Courses list* to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

The courses that run in each academic year are subject to change in line with faculty availability and student demand, and may have limited capacity or be unavailable to you due to the timetable. There is, therefore, no guarantee every course will be available every year.

THIRD YEAR

Required course list (Computer Science):

- LDSCI6253 Advanced Information Presentation & Visualisation (L6, 15 credits)
- LCSCI6206 Fundamentals of Software Engineering (L6, 15 credits)
- LDSCI6209 Large-scale Information Storage and Retrieval (L6, 15 credits)

Required course list (Business):

- LBUSI6205 Strategic Analysis and Decision Making (L6, 15 credits)
- LBUSI6203 Supply Chain and Operations Management (L6, 15 credits)

One out of:

- LBUSI6202 Fintech and Financial Innovation (L6, 15 Credits)
- LBUSI6201 Innovation! (L6, 15 credits)

Required course (typically integrative):

- Final Project (Computer Science/ Business) (L6, 30 credits)

Politics & Data Science BSc (Hons)

The BSc (Hons) Politics and Data Science programme combines in-depth study of Politics and Data Science while exploring the dynamic connections between them.

The Politics component of this programme undertakes a comprehensive study of political science, political theory, and international relations. Delve into the intricacies of government and society, explore normative questions and ideologies, and gain insights into global issues such as war, peace, security, economy, and globalisation.

The Data Science element of the programme concentrates on the collection, storage, retrieval, and computational analysis of data in various formats, ranging from images to text, and at different scales, from small to big data. It covers essential topics such as programming, machine learning, data mining, and information visualisation. Gain the knowledge and skills to effectively programme with data, extract insights, interpret findings, and visualise information to solve real-world problems.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This programme is designed to provide a unique and interdisciplinary approach, combining in-depth study of politics and data science with the flexibility to either specialise or explore other related fields with elective courses based on your interests and aspirations.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

The courses that run in each academic year are subject to change in line with faculty availability and student demand, and may have limited capacity or be unavailable to you due to the timetable. There is, therefore, no guarantee every course will be available every year.

FIRST YEAR

Required course list (Politics):

- LPINT4234 Introduction to Politics and International Relations (L4, 15 credits)
- LPINT4231 Comparative Politics (L4, 15 credits)
- LPINT4233 International Relations in Practice (L4, 15 credits)

Required course list (Data Science):

- LCSCI4212 Discrete Structures (L4, 15 credits)
- LDSCI4211 Programming with Data (L4, 15 credits)
- LDSCI4210 Intermediate Programming with Data (L4, 15 credits)

In addition, take available L4 courses from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

Not required but recommended:

- L4 Mathematics or L4 Calculus for Business; L4 Statistics or L4 Business Statistics

SECOND YEAR

Required course list (Politics):

- LPINT5241 The European Union in the World (L5, 15 credits)
- LPINT5249 Societies in Transition (L5, 15 credits)
- LPINT5239 Political Arguments in Action (L5, 15 credits)

Required course list (Data Science):

- LDSCI5206 Advanced Programming with Data (L5, 15 credits)
- LDSCI5247 Foundations of Data Science (L5, 15 credits)
- LDSCI5209 Information Presentation and Visualisation (L5, 15 credits)

Required course (integrative):

- LDSCI5207 Experimental Data Science Project (L5, 15 credits)

In addition, take any available L5 course from the University Courses list to add up to 120 credits, selected with an Academic Adviser so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list (Politics):

- LPINT6244 International Organisations (L6, 15 credits)
- LPINT6242 Security Studies (L6, 15 credits)
- LPINT6241 Sustainable Development (L6, 15 credits)

Required course list (Data Science):

- LDSCI6210 Machine Learning and Data Mining I (L6, 15 credits)
- LDSCI6211 Machine Learning and Data Mining II (L6, 15 credits)
- LDSCI6209 Large-Scale Information Storage and Retrieval (L6, 15 credits)

Philosophy & Computer Science BSc (Hons)

BSc (Hons) Philosophy & Computer Science combines study of Philosophy and Computer Science exploring where mind and machine meet.

Delve into the cutting edge intersection of humanities and science. Study the fundamental philosophical questions, arguments, theories, and texts that explore the world and our place within it. Foster rigorous and clear thinking and writing, addressing inquiries about the nature of reality, knowledge, and ethical actions.

Discover the interconnectedness of human and artificial intelligence as you acquire the technical knowledge, techniques, and tools needed to develop effective and secure computer software within legal, ethical, and professional frameworks. Apply your deep thinking skills to programme design, software development, computer organisation, systems and networks. Discover where Philosophy and Computer Science intertwine in the theory of computation, principles of languages, as well as advanced algorithms and data.

Our Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. We maximise the opportunities for students to bridge the gap between theory and practice ensuring that you are industry ready as soon as you graduate.

This degree programme merges a demanding philosophy and computer science curriculum with a tailored elective path, allowing you to delve deeper into philosophy and/or computer science or venture into a wider array of complementary and interconnected subjects.

This programme is designed to enable eligible students the option to study abroad in the second semester of their second year. Advice and support on specific opportunities will be provided by your Academic Advisers.

The courses that run in each academic year are subject to change in line with faculty availability and student demand, and may have limited capacity or be unavailable to you due to the timetable. There is, therefore, no guarantee every course will be available every year.

FIRST YEAR

Required course list (Computer Science):

- LCSCI4212 Discrete Structures (L4, 15 credits)
- LCSCI4207 Fundamentals of Computer Science I (L4, 15 credits)
- LCSCI4208 Fundamentals of Computer Science II (L4, 15 credits)

Required course list (Philosophy):

- LPHIL4239 Introduction to Philosophy (L4, 15 credits)
- LPHIL4228 Introduction to Logic (L4, 15 credits)
- LPHIL4230 Technology and Human Values (L4, 15 credits)

In addition, take available L4 courses from the University Courses list* to add up to 120 credits, selected with an Academic Advisor so as to support progress towards meeting all (including core) programme requirements by the end of the third year.

SECOND YEAR

Required course list (Computer Science):

- LCSCI5205 Object-Oriented Design (L5, 15 credits)
- LCSCI5204 Algorithms and Data (L5, 15 credits)
- LCSCI5208 Database Design (L5, 15 credits)

Required course list (Philosophy):

- LPHIL5228 Ancient Philosophy (L5, 15 credits)
- In order to meet the relevant discipline learning outcomes, take at least TWO other L5 Philosophy courses from the University Courses list*, at least ONE of which is in theoretical philosophy.

Required course (integrative):

- LPHIL5248 AI and Data Ethics (L5, 15 credits)

Note: this course can be counted towards the above L5 Philosophy discipline requirement.

In addition, take any available L5 course/s from the University Courses list* to add up to 120 credits, selected with an Academic Advisor so as to support progress towards meeting all (including Core) programme requirements by the end of the third year.

THIRD YEAR

Required course list (Computer Science):

- LCSCI6206 Fundamentals of Software Engineering (L6, 15 credits)

TWO additional courses from this list*:

- LDSCI6253 Advanced Information Presentation and Visualisation (L6, 15 credits)
- LDSCI6209 Large-Scale Information Storage and Retrieval (L6, 15 credits)
- LDSCI6210 Machine Learning and Data Mining I (L6, 15 credits)
- LDSCI6211 Machine Learning and Data Mining II (L6, 15 credits)
- LCSCI6207 Human Computer Interaction (L6, 15 credits)

Required course list (Philosophy):

- LPHIL6239 Philosophy of Logic and Language (L6, 15 credits)
- In order to meet the relevant discipline learning outcomes, take TWO additional Philosophy courses (typically all at L6) from the University Courses list*.

Required course (typically integrative):

- LPHIL6237/LDSCI6208 Final Project (Philosophy / Computer Science) (L6, 30 credits)

02 INTERDISCIPLINARY STUDY

NU London degree programmes offer you the opportunity to create your own bespoke programme of study with your personal choice of elective courses* alongside your main degree subject.

YOUR DEGREE, YOUR WAY

Expand your horizons and embrace interdisciplinary learning by using your electives to delve deeper into your degree subject(s) or explore wider areas of interest. Develop agile thinking that transcends traditional disciplinary boundaries and gain a well-rounded education that prepares you for a rapidly evolving world.

PERSONAL ACADEMIC ADVISERS

Your academic adviser will be on hand throughout your studies to help you to select the specific elective courses or pathways that will suit your interests, aptitudes and aspirations.

WHAT IS AN ELECTIVE?

Courses on the University Course List are available as electives, subject to timetable, pre-requisites, and availability*. Electives provide students with the opportunity to create a bespoke programme of studies.

PATHWAYS

NU London's broad range of electives allows for students to gain significant experience in disciplines outside their main area of study. Students can apply for official recognition of this experience in their University documents upon graduation, in the form of a 'pathway'. Pathways can be achieved by completing three courses, associated with a given discipline or theme, across at least two levels.

A wide range of 'discipline' pathways are available, including Art History, Creative Writing, Computer Science, Data Science, Economics and Mathematics. We currently offer two interdisciplinary 'thematic' pathways, Political Thought and Sustainability. Depending on the number of electives available within your degree programme, it may be possible to complete two or even three pathways before graduation. Your academic Adviser will be able to recommend the electives you will need to acquire a given pathway.

* University Courses List Conditions

The optimal/elective courses that run in each academic year are subject to change in line with faculty availability and student demand, and may be capped or be unavailable in the timetable, so there is no guarantee every optional/elective course will be available every year. Where a course is set to run, students for whom it is an option will typically be given priority over students for whom it is only an elective.

Please refer to the degree programme pages for detailed information about required and elective courses.

PATHWAYS

ART & DESIGN
ART HISTORY
BUSINESS
COMPUTER SCIENCE

Experiential Learning

Experiential opportunities within and beyond the classroom

Our education embraces 'learning by doing'. It integrates classroom learning with wider-world experience, empowering you to make a meaningful impact and to transform knowledge and skills across contexts.

You'll have the opportunity to engage in immersive learning experiences that are co-created with industry, public sector, not-for-profit, community, and research organisations.

Capitalising on our prime location within the global university network, we maximise the opportunities for students to bridge the gap between theory and practice. Unlock the potential to gain real-world and international experience while advancing towards your degree.

Your Careers & Experiential Learning Advisor will support you to build your unique experiential journey to enhance your employability and align with your aspirations and goals.

Explore a world of extraordinary experiential learning opportunities, including:

- Case Studies, Simulations, & Role Play
- Prototyping
- Guest Speakers & Practitioner Workshops
- Site Visits & Field Trips
- Impact Challenges
- Studio + Projects
- Co-op Placements & Internships
- Faculty-sponsored Research
- In-the-Field Experiential Projects
- Industry Bootcamps
- Competitions, Hackathons, Maker Faires
- Global Experiences
- Student Governance and Organisations
- Networking & Mentorship
- Entrepreneurship
- Career Design

Co-op Placements

The cornerstone of Northeastern's global educational model. Cooperative education ('co-op') is one of the fundamental experiential learning opportunities where you engage with the world through work experience.

Participating in a co-op means integrating your academic studies with periods of immersive work experience.

At NU London, we offer you the opportunity to engage with the world through immersive work experiences that transform your knowledge and skills across multiple contexts. By participating in a co-op, you'll integrate your academic studies with hands-on work experience. Plus, you'll have the chance to earn academic credit through our reflective In-the-Field Experiential Project, enabling you to advance with co-op towards your degree.

Undergraduates become eligible for co-op once they have successfully completed three semesters of study.

Every student at NU London has a dedicated Careers & Experiential Learning Adviser who provides support throughout the co-op process.

In addition to providing exceptional career outcomes, co-op and other experiential learning opportunities spark curiosity and insight, expand your ability to solve problems creatively and collaboratively, deepen your thinking, and prepare you for a lifetime of personal and professional growth.

- Northeastern's global Co-op employer network includes over 3,000 employers across 131 countries and all 7 continents
- Co-op placements are typically 3 to 6 months, but can be up to 9 months
- Co-ops may be full-time or part-time; paid or unpaid; in-person, hybrid, or virtual
- Your Careers & Experiential Learning Adviser will be on hand to advise you about co-op opportunities around the world

03 GLOBAL EXPERIENCE

Study Abroad opportunities

Get ready to make memories that will last a lifetime! You'll have the chance to meet new people, explore new places, and expand your knowledge in two of the world's most prestigious academic systems, broadening your horizons and paving the way to a successful global future.

INTERNATIONAL STUDY OPPORTUNITIES

Expand your horizons, broaden your perspectives, and embrace the transformative power that experiencing academic and cultural life in another country brings. Study at one of Northeastern University's campuses in the USA, including Boston in Massachusetts, or Oakland in California and immerse yourself in American culture and learn from a US curriculum. Through studying abroad you will forge lifelong friendships and connections and unlock doors to exciting networking and experiential learning opportunities.

SEMESTER ABROAD

A unique opportunity to spend the second semester of your second year studying at one of Northeastern University's vibrant campuses in the USA. Immerse yourself in sophomore life, connect with students pursuing an array of majors and experience the unique atmosphere of an American campus. You'll follow a US curriculum during your semester abroad and the credits earned in the USA will contribute towards your undergraduate degree programme at Northeastern University London. This means that when you return to London to finish your studies, you will have the opportunity to graduate alongside your fellow classmates.

DIALOGUE OF CIVILIZATIONS*

Take your interdisciplinary study to the next level! Apply for a novel, eye-opening, and enlightening global experience with Northeastern faculty. Dialogue of Civilizations programmes are faculty-led international programmes, offered either Summer 1 (May-June) or Summer 2 (July-August).

You'll typically spend around 6 weeks in-country with a faculty leader following an intensive course. Programmes focus on critical contemporary issues facing students and their peers at both the local and global levels and take place at various locations around the world. You'll explore the local areas through field trips to cultural institutions and events and visit many culturally relevant and interesting places. Dialogues will challenge you intellectually and enhance your intercultural awareness.

Examples of Dialogues and locations include

- Entrepreneurship and Global Consulting – Italy
- Games, Art and Play in Japan – Japan
- Building a more sustainable and resilient future: understanding the role of firms and cross-cultural literacy – Brazil
- Software development and innovation – Australia
- Textiles and Creative Coding – Austria
- China from West to East – China
- Data & Software in International Government And Politics – Belgium
- Ethnography, Culture and Municipalities Through A Sociological Lens – Spain
- Climate Science, Engineering Adaptation, and Policies in Emerging Economies – Indonesia
- Experiencing the 'Old' & 'New' Middle East – Amman

* Additional costs apply including the DOC fee, accommodation and excursion costs, travel, transport and food expenses.

UK & US degree options

Imagine experiencing university life in two countries, immersing yourself in two different cultures, and earning two degrees in just four years. After graduating from Northeastern University London in the UK, you can undertake a fourth year of additional study at one of Northeastern University's campuses in the USA. Your NU London degree credits contribute towards a second US bachelors degree in a complementary subject, or your Northeastern University London undergraduate degree can open up the opportunity to study for an accelerated US masters degree, advancing your skills and expertise even further.

Northeastern University tuition fees and programme fees are payable for a fourth year of study in Boston, Oakland or any other North American campus.

DOUBLE DEGREE WITH A YEAR STUDYING IN THE USA

A UK undergraduate degree awarded by Northeastern University London, and a US bachelor's degree awarded by Northeastern University (Boston, MA). Double degree students undertake their fourth year of study in the USA.

ACCELERATED US MASTERS DEGREE

The accelerated Masters allows students to complete a UK undergraduate degree and a Masters degree from either the UK or another global campus within as little as four years. Credits from select NU London electives will be transferable into the US Masters degree, decreasing the time required for the programme and the overall fees payable (alongside the husky or alumni discount).

ALUMNI POSTGRADUATE STUDY FEE DISCOUNTS

UK masters degree fees –
20% NU London Alumni Discount.
US masters degree fees –
25% Double Husky Scholarship.

POST STUDY WORK VISAS

Depending on whether you choose to spend your final year in the United Kingdom or the United States, students may be eligible for Post Study Work Visas in the United Kingdom or Optional Practical Training (OPT) in the United States.

* Double degree option is not available for UK undergraduate LLB (Hons) Law students.

Teaching & Assessments

At Northeastern University London you'll find a vibrant and close-knit academic community. We believe in creating an environment where everyone has the opportunity to participate and excel, and cultivate a supportive and collegiate atmosphere that nurtures personal and academic growth.

FACULTY

The University's interdisciplinary ethos attracts expert faculty who are actively involved in innovative research. Academic staff channel their cutting-edge knowledge and their enthusiasm through their teaching to enrich our students' learning experience.

TEACHING METHODOLOGY

Courses are delivered face-to-face on campus through a variety of engaging formats that can include

- Lectures/seminars/labs/studios/workshops
- Directed study (1:1, 2:1, or small group teaching on specific topics)
- Informal discussion (including on online discussion boards and in regular faculty 'office hours', which are opportunities for students to drop in or sign up to explore ideas, raise questions, or seek targeted guidance or feedback, individually or in small groups)
- Formative and summative assessment tasks
- Independent study and research

Most lectures and seminars in our degree programmes will have a maximum of 40 student participants, while tutorials will typically have five or fewer students, and may include one-to-one tutorials. This personalised approach to teaching allows everyone to participate and thrive.

The exact balance of these types of learning and number of contact hours will depend on the specific elective courses you choose.

YOUR ASSESSMENTS

Throughout your academic journey, you will undergo a wide range of unique and personalised assessments that are both authentic and inclusive. These assessments have been carefully designed to ensure a comprehensive evaluation of your skills and knowledge.

As part of our dedication to experiential learning, our assessment approach emphasises the practical application of knowledge and skills in real-world scenarios, ensuring your active involvement and readiness for both professional success and active citizenship. Assessments align with your individual interests, ambitions, and objectives, while also providing valuable opportunities to enhance and refine essential knowledge and skills.

We offer a diverse range of assessment methods, including portfolio assessments, interactive simulations or role plays, collaborative group work, practical exercises, written coursework, comprehensive exams, and engaging presentations. We firmly believe that assessments are not just a way to measure learning, but also a powerful tool for learning. Whether your assessment is formative or summative, you can expect to receive valuable feedback that will inspire and motivate you to continue your learning journey.

Courses at the University are assessed formatively and summatively in a variety of ways, including:

- Written Assignment (e.g. long-form coursework essay; study report; literature review; reflective essay; dissertation)
- Examination (e.g. open book scheduled exam; closed book exam; 24-/48-hour exam)
- Presentation (e.g. oral presentation with accompanying slides; Viva voce)

- Role Play (e.g. Moot; consultancy simulation)
- Practical (e.g. lab skills assessments)
- Artefact (e.g. piece of code or poem with an accompanying report)
- Portfolio (students only have one final, formal deadline, but what they submit includes a series of shorter pieces created and reflected upon and revised across the course)
- Set Exercises (e.g. a series of short set exercises distributed across the course)

Core Competencies

Core competencies are embedded within our degree programmes, so that you stand out from the crowd and are ready to succeed as soon as you graduate.

By the time you graduate, you will have taken courses with the following three core attributes:

- Writing Across Audiences and Genres
- Integrating Knowledge and Skills Through Experience
- Demonstrating Thought and Action in a Final Project.

You will also have taken courses with at least FOUR of these attributes, depending on your individual learning pathway:

- Engaging with the Natural and Designed World
- Exploring Creative Expression and Innovation
- Interpreting Culture
- Conducting Formal and Quantitative Reasoning
- Understanding Societies and Institutions
- Analysing and Using Data
- Engaging Differences and Diversity
- Employing Ethical Reasoning

State-of-the art campus

Our campus buildings are right on the doorstep of the City, London’s bustling Central Business District, a global hub for trade and commerce.

The City is home to numerous prestigious institutions including the Stock Exchange and the Bank of England, and a diverse range of industries, including finance, law, culture and creative sectors, tech companies, start-ups, and booming scale-ups. Thriving East London Tech City, a vibrant hub of cutting-edge technology companies and innovative web businesses, is also conveniently located just minutes away.

You’ll be able to immerse yourself in an inspirational city offering exciting opportunities for networking, work experience, internships, and employment, whatever path you choose to follow.

DEVON HOUSE

Devon House is situated at the heart of bustling St Katharine Docks, just a few minutes’ walk from the historic Tower of London and iconic Tower Bridge. Devon House enjoys stunning river views from both inside the building and from its outside terraces and open areas. At the center of a lively marina, it forms the heart of a thriving waterside community, surrounded by dozens of enticing restaurants, charming cafes, and popular bars. Devon House offers a stunning setting that perfectly complements its vibrant atmosphere.

The campus is located on the ground, first and second floors of Devon House covering over 48,000 square feet of state-of-the-art facilities for students and staff.

ONE PORTSOKEN

One Portsoken is conveniently situated near the City’s bustling financial district. Within a few minutes’ walk, you can immerse yourself in the vibrant shops and restaurants of Brick Lane. Take a stroll to the south and discover the iconic Tower Bridge, where you’ll also find our Devon House campus, the cosmopolitan St Katharine Docks marina, and the majestic River Thames.

From September 2024, One Portsoken will offer circa 24,000 square feet of brand new, state-of-the-art facilities for students and staff. By September 2025 a further 74,000 square feet will be available for the campus community.

MARBLE QUAY

Marble Quay is situated just across a cobblestoned path from Devon House.

The Marble Quay offices house Northeastern University London’s body of staff, both Professional and Academics, who ensure the day-to-day running of the University and its planning for the future.

ACCESSIBILITY

Our campus buildings are access friendly and welcoming to all, with lifts, wide entry points, adaptable furniture, and hearing loops.

DEVON HOUSE AND ONE PORTSOKEN FACILITIES

- Innovative and modifiable classrooms
- Cutting edge audio-visual technology
- Tutorial rooms
- Co-Lab Study spaces
- Seminar & event spaces
- Private study pods
- Quiet study zones
- Breakout and group collaboration spaces
- Student Support & Development rooms
- Multi-faith rooms
- Free Wi-Fi access
- Printers for students and staff
- Refreshment areas
- Campus Hub space
- Bar and Events area
- Disabled access & support
- Bike storage
- Showers

London as your classroom

London is one of the best places to study in the world! You'll discover that London is an extension of your classroom, integrating real experiences with your academic studies and bringing your degree to life.

Our innovative Experiential Learning approach embraces the concept of 'learning by doing', seamlessly blending the classroom with real-world experiences. By capitalising on our prime location at the doorstep of the City, we maximise the opportunities for students to bridge the gap between theory and practice.

You'll immerse yourself in an inspirational city offering exciting opportunities in the field of experiential projects for networking, site visits, work experience with large corporates, start-ups, not-for-profit, community, or government organisations, or employment, whatever path you choose to follow.

London is a city where heritage intertwines with cutting-edge innovation, you'll be inspired by leading research institutes, renowned libraries and archives, vibrant galleries, world-class theatres, museums and cultural institutions.

Sit in on a trial at the Royal Courts of Justice, watch politics in action from the public gallery at the House of Commons, explore 1,000 years of history at the Tower of London, wander the streets of the square mile and immerse yourself in one of the world's biggest commercial and financial districts, explore the history of technology at the science museum and the latest innovators are Here East, head to the West End to watch literature studies brought to life on stage, or attend a free talk at the London Philosophy Club.

Libraries & study spaces

As an NU London student there are a number of world class libraries in London and online at your disposal.

Northeastern University Library

NU London students have access to most of the vast digital resources available from Northeastern University's Library, with over 1.5 million e-books, 200,000 electronic journals and 300,000 streaming video and audio titles in the collection. The Library also offers a number of helpful resources including a 24/7 LibChat service, one-to-one assistance from subject specialist librarians and workshops and events throughout the year.

Senate House Library

NU London students can sign up for membership to Senate House Library, one of the UK's largest academic libraries for arts, humanities & social sciences. Located in central London, it is home to over two million books and over 1800 archives and special collections. It's also a great place to study late. Details on how to sign up for membership will be provided during Welcome Week.

www.senatehouselibrary.ac.uk

City of London Libraries

Students can also become members of the City of London's lending libraries at the Barbican Centre, Shoe Lane and Artizan Street. Facilities offered at these libraries include study space, wifi, printing, book borrowing privileges and access to digital resources. In addition, access can be requested to the CoL research libraries - Guildhall Library and the London Metropolitan Archives.

<https://bit.ly/studentcitylibraries>

British Library

London has a superb collection of top-notch libraries, including the renowned British Library. Its Reading Rooms are dedicated spaces for quiet study where you can explore any of the 170 million items in the British Library's collection. Access to the Reading Rooms is with a Reader Pass, which you can get for free.

<https://bit.ly/blreadingrooms>

Westlaw and LexisNexis

Students on the Law course have full access to the most up-to-date law reports, case law, legislation, journal articles and more through the Westlaw and LexisNexis online legal databases.

For more information please refer to our widening participation section on our website: nulondon.ac.uk/widening-participation

Widening participation

We recognise the importance of having a student body at NU London that reflects the diversity represented across wider society.

We understand that there can be barriers that may deter students from pursuing their university career, and therefore we aim to provide support in order to admit the brightest and best students regardless of their background.

CONTEXTUAL OFFERS

When we review applications we take into consideration a number of socio-economic factors, school performance data, and other pieces of information for UK applicants. We give additional consideration to students from specific widening participation groups. This is to recognise the potential of talented students from all backgrounds.

If a candidate meets certain eligibility criteria, we may make an offer lower than our typical entry requirements that recognises the potential of students whose personal circumstances may have restricted achievement at school or college. This is called contextualised admissions.

SUPPORT AS YOU PREPARE TO START UNIVERSITY

Preparing to start university is an exciting time, but we know that it can also sometimes be challenging and that prospective students may have lots of questions.

Every widening participation student who receives an offer to study at NU London is given a personal contact who will offer advice and support in the lead up to starting university including how to apply for Student Finance, choosing accommodation, answering questions about degree courses and studying at Northeastern University London, as well as student life in London generally.

BURSARIES

We are committed to providing support to students who require financial assistance to study.

Means tested bursaries can be used to help with living costs, to pay for accommodation, or to help with tuition fees.

Find out more at nulondon.ac.uk/home-fees

International students

Northeastern University London is a truly global university. Students come to study here from all over the world. Our campus is home to a community of around 1,500 students, with more than 74 different nationalities and we welcome the different perspectives and experiences that students from diverse countries and backgrounds can bring.

London's multicultural environment provides opportunities for people from all backgrounds to connect, collaborate, and thrive. It's a city that welcomes diversity and promotes inclusivity.

UK STUDENT VISA

In order to study in the United Kingdom international students may require a visa. If you are an international student who is coming to Northeastern University London to study a programme that is longer than 6 months, you must apply for a Student Visa before coming to the UK. This visa has replaced the Tier 4 visa.

Northeastern University London is licensed by the UK government to sponsor your visa application for all of our programmes.

We know that visa applications can be complicated and daunting, so we have a dedicated Visa Compliance Team at the University who are on-hand to help you through the visa process.

For the most up-to-date information please visit our [website: nulondon.ac.uk/visas](https://www.nulondon.ac.uk/visas)

WORKING RIGHTS FOR INTERNATIONAL STUDENTS WHILST STUDYING

International students studying a full time programme at the University will be able to work part time (max 20 hours) during semester time and full time during scheduled semester breaks.

ENGLISH LANGUAGE REQUIREMENTS

If English is not your native language, you will need to demonstrate proficiency in English in order to study at the University. Students must have a good command of English and be able to communicate in an academic environment.

For further information and full details of the English tests we consider, please see our [website: nulondon.ac.uk/entry-requirements](https://www.nulondon.ac.uk/entry-requirements)

Academic Support

Every student at NU London has a designated Academic Adviser, who will be able to provide support and guidance on every aspect of University life.

Before you start your undergraduate degree programme at NU London, your Academic Adviser will be able to discuss the elective courses available to you, the conditions of each pathway, and the different options available to you within the Northeastern global network, and so will help you establish a plan for your time with us.

Further, Advisers will provide clarity on issues of university procedure and policy, adapting to life in London, and the other support and services available to you.

Students will also have access to a designated English and Academic Language Adviser, a Maths Tutor, and, for students with a recognised specific learning difference, a SPLD Adviser focused on such issues as dyslexia, ADHD, and autism.

Student Support and Development

At Northeastern University London, we understand the importance of providing comprehensive support to our students.

The Student Support and Development team are here to help students manage all the ups and downs of life at university.

Whether you need guidance on academic matters, personal support, or wellbeing, our team of experienced professionals is here to assist you every step of the way.

The team specialises in

- Understanding student finance & student loans
- Money advice and budgeting
- Navigating the Disabled Students' Allowance (DSA) and advice and support to offer holders wanting to apply for DSA
- Provide help and advice to students with a learning difference
- Help for students with short-term physical issues, e.g. broken arm
- Mental health and wellbeing
- Support for independent, care-experienced and estranged students

SUPPORT FOR MENTAL HEALTH AND WELLBEING

Our team is trained and experienced and are on hand to offer support to students experiencing mental health challenges, whether it is a diagnosed mental health condition or new feelings of being low, anxious or distressed. We can also help students to manage their mental wellbeing, help navigate NHS services and provide referrals to counselling or coaching.

24 HOUR SUPPORT

Students at the University have access to Spectrum Life Student Assistance Programme (SAP). The SAP has a 24/7 helpline that gives in-the-moment support to students who are struggling and need assistance out of hours. Spectrum Life also hosts a platform and App to support mental and physical wellbeing and includes healthy recipes, fitness videos, podcasts, meditations, etc which students can use freely.

MENTAL HEALTH CHARTER PROGRAMME

The University has joined the Student Minds Mental Health Charter Programme, demonstrating our commitment to developing a whole-institution approach to mental health and wellbeing and creating cultural change.

Careers Support

Our dedicated Careers & Experiential Learning Advisers work with students from their first year to identify and support career goals and ambitions. Some students arrive at the University with their career path clearly mapped, others need help finding their direction. Our Advisers are here to help both.

Advisers will help to identify aspirations and explore careers, to develop a personal narrative and plan for personal and professional experiences that make Northeastern University London's students compelling candidates. Our careers support is designed to teach students how to succeed in the different aspects of marketing themselves to potential employers, from initial application form to final interview.

Our Advisers are here to help you achieve your ambition and have expertise in a wide range of sectors including professional services, government, creative industries, law, and banking.

At Northeastern University London, our team of dedicated Careers and Experiential Learning Advisers will work closely with you to create a personalised experiential journey that enhances your employability potential and aligns with your aspirations and goals.

CAREERS EVENTS

Our Careers Advisory Service hosts a series of events and opportunities with guest speakers, alumni and industry panels across a range of sectors, as well as providing seminars and clinics on key topics.

Careers clinics, 1:1 advising, and weekly drop-ins

- 'Day in the Life of' events
- Co-op and internship guidance and support
- Mock interviews and simulated industry tests
- Guest Lectures and Practitioner Workshops

ENTREPRENEURSHIP

Our Start-Up hub, launched Spring 2024, is a dynamic centre for innovation, connecting the local startup ecosystem, entrepreneurs, investors, industry, and community, with researchers and alumni while also harnessing the potential of our global entrepreneurship network.

NETWORKING AND CAREER CONNECTIONS

Build connections with tech and public sector partner-employers around the City and East London Tech City as well as access to over 250,000 alumni. Our graduates also benefit from access to the Northeastern University Employer Network.

ALUMNI & NETWORK OPPORTUNITIES

We're proud to be at the heart of a community of brilliant, entrepreneurial, and enthusiastic graduates, academics, and professionals who make up the University's alumni.

Career events offer opportunities to network with alumni and industry professionals across a range of organisations and sectors, where students can share their aspirations and make real connections with individuals.

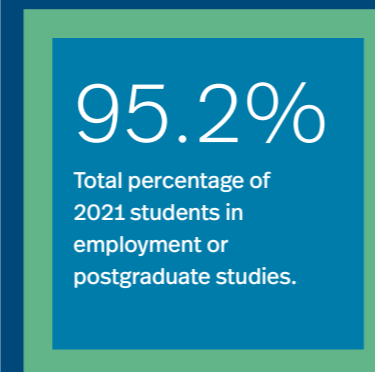

Our extraordinary graduates

The outstanding achievements of our graduates, year on year, prove that our unique curriculum produces young people who not only have an excellent degree, but who are also highly desirable in the graduate recruitment market and well-prepared to make the transition from university to the world of work.

Equally, many of our graduates have used their degree as a springboard to progress to postgraduate study at some of the world's other top universities.

Our graduates are employed in a range of roles in national and international companies, including finance, technology, media, consulting, health, government, creative industries, law, social enterprises, and charities.

As well as graduates who choose to follow corporate career paths, some students are entrepreneurial and combine the skills they have acquired with their energy and passion, electing to join start-ups, as well as launching their own.

LIVING THE LONDON LIFE

Experience living in one of the most dynamic and diverse cities in the world!

No matter what your interests or what you want to get out of London, there is always something to do or somewhere to be, from art galleries and museums, theatres and historical sites, to clubs, restaurants and bars, vibrant food markets, world-famous shopping streets, spectacular parkland, major sporting events, or even boating on the Thames!

Broaden your horizons even further using London as your gateway to travel and explore Europe independently, with four international airports offering flights across the entire continent, and Eurostar connecting London to Paris directly via train.

For some students, the thought of studying in a vast city like London may be daunting, but at Northeastern University London you will enjoy the best of both worlds: a supportive, friendly community with excellent pastoral care in the bustling heart of London.

Whether you want to see your favourite band perform, visit a world-famous gallery, or have a great night out, there is always something to do and people to do it with.

Student Union

Beyond the classrooms and lecture halls, NUSU London offers students a vibrant social life.

NUSU London promotes the interests of the student body as well as planning social and extracurricular activities and providing support to student clubs and societies.

NUSU London has three key objectives:

- Drive positive change to develop student advocacy capacity.
- Create a consistent and fair environment between the Union, University and students.
- Provide strong and representative student life experiences.

All NU London students are automatically enrolled as members of NUSU London.

Through NUSU you'll be able to join the student organisations, clubs, and societies that align with your interests and passions. Immerse yourself in sports, arts, cultural activities, and events that will nurture your talents and help you strike a healthy balance between academic pursuits, enjoyable social events, and personal well-being.

NUSU London actively supports new ideas and opportunities to start additional clubs and societies.

TEAM SPORTS

London offers a host of opportunities to get involved in team sports at every level! From football, hockey, and tennis to ultimate frisbee, softball, and tag-rugby, you'll be spoilt for choice, whether you want to take part in friendly knockabouts in London's beautiful parks, or serious national league competitions.

GYM MEMBERSHIP

Some of our student accommodation halls have onsite gym facilities. There is also a wide choice of gyms around St Katharine Docks that offer reduced membership fees for students.

Accommodation

Our Accommodation Team are here to give detailed information about

- Costs
- Locations and Providers
- Housing Contracts
- Application Timelines and StarRez guidance
- Residence Life provision within housing

Our recommended halls offer excellent security, comfy rooms and spacious communal areas, and are a short commute to campus.

You'll find that living alongside fellow students from NU London when you start your degree is a great way to make friends and to get your bearings in London.

RESIDENCE LIFE CO-ORDINATORS

Residence Life Co-ordinators live onsite in our partner halls to support our students and organise social activities and entertainment.

Living in halls offers a great opportunity to meet and mix with students studying a huge variety of subjects at other London universities, giving you a cosmopolitan halls accommodation experience.

PRIVATE RENTALS

Many London students live in privately rented property either with friends or on their own. You'll find lots of hints and tips about renting on our accommodation webpage.

LIVING AT HOME

Living at home keeps costs down and allows you to enjoy the support of your family. Students who live at home are still able to make the most of the NU London social life through events both on and off campus organised by Student Life and NUSU.

For full information please check online: nulondon.ac.uk/accommodation

How to apply

1. CHOOSE YOUR DEGREE

2. SUBMIT YOUR APPLICATION

You can apply to the university as one of your five choices through UCAS.

Our institution code is **N53** and the institution name is **Northeastern University London**.

Or, if you are only applying to Northeastern University London, you can apply to us directly via nulondon.ac.uk.

We accept direct applications on a rolling basis, so you can apply before or after the UCAS deadline.

We also accept applications via the CommonApp.

3. NORTHEASTERN UNIVERSITY LONDON APPLICATIONS

All applications to the University are carefully considered by our admissions tutors. Applicants may be invited to an interview, which will take place via Zoom.

4. OFFERS

If we make you an offer, a formal offer pack will be sent out to you.

If you are only applying to Northeastern University London, you can apply to us directly via nulondon.ac.uk

Entry requirements

Students will need to be 18 years of age on the 1st September in the year of entry.

TYPICAL ENTRY REQUIREMENTS

A-levels: AAB. A-level General Studies, Critical Thinking, Thinking Skills and Global Perspectives are not accepted as one of your A-levels. We normally also do not accept native language A-levels. Students studying the Extended Project Qualification (EPQ) alongside three A-levels may be eligible for an alternative offer.

IB: 35 points overall or alternatively 6,6,5 in HL subjects (with an overall pass). The overall score of 35 points includes the TOK and the Extended Essay.

Equivalences for other UK and international qualifications, please see: nulondon.ac.uk/entry-requirements

This document is prepared ahead of the academic period to which it relates to provide potential students with an overview of the programmes for which they are applying. As a result, there may be infrequent occasions when the University is unable to offer individual courses, degree programmes, or services described herein. Furthermore, the University reserves the right to withdraw individual courses or degree programmes where there is an insufficient number of applications or confirmed students to make the course viable.

On such occasions, students will be informed of changes within a reasonable timescale and another individual course or degree programme will be offered, which will have equal academic benefit to the course or degree programme originally described.

From time to time, individual faculty members may stop teaching at the University. In such instances, the University will undertake reasonable endeavours to ensure that students are taught by another academic with an equivalent level of qualification, research interests, and experience.

Fees & Funding

TUITION FEES FOR HOME STUDENTS

The tuition fees for September 2024 entry are £9,250 for home students.

TUITION FEES FOR INTERNATIONAL STUDENTS

Please see individual degree pages.

TUITION FEE LOANS

Home students starting their first undergraduate degree may be eligible to apply for a tuition fee loan.

To determine if you are entitled to a tuition fee loan, and how to apply, please visit [gov.uk/student-finance](https://www.gov.uk/student-finance)

There are funding agencies in the UK for England, Scotland, Wales and Northern Ireland, to which you should apply depending on your residency.

MAINTENANCE LOANS

Students who are resident and settled in England may be eligible for a maintenance loan from the Student Loans Company.

The amount of loan you receive will vary according to your household income. For further details on maintenance loan amount and eligibility, please visit [gov.uk/student-finance](https://www.gov.uk/student-finance).

BURSARIES

Please note that only home fees students are eligible to apply for a means-tested bursary.

The university warmly welcomes students from all backgrounds, and we are committed to providing support to students who require financial assistance to study.

Bursaries can be used to help with living costs, to pay for accommodation, or to help with tuition fees. Find out more at nulondon.ac.uk/home-fees

EU STUDENTS

EU, EEA and Swiss citizens with settled status (or Indefinite Leave to Remain or permanent residency) who have been ordinarily resident in the UK or Islands for the three years immediately before the start of their course (unless the residency in the UK or Islands was mainly for the purpose of education) may be considered home students for tuition fees.

The UK and Ireland have agreed that students from Ireland will continue to have home fee status in the UK, under the arrangements of the Common Travel Area.

All information related to fees, loans, scholarships and bursaries is correct at the time of publication but may be subject to changes in UK government funding policy. Please visit nulondon.ac.uk/home-fees for up to date information. If you would like to discuss student finance, please contact us via study@nulondon.ac.uk.
